Questions & Answers L-177
Posted 12/22/2009

Question L-177 - Upon receipt of the response to questions regarding the bidders responsibility to procure Removable Lid Canisters (RLCs), Standard Waste Boxes (SWBs), and payload assembly hardware for 14-drum payload assemblies and 2-SWB payload assemblies for Waste Isolation Pilot Plant (WIPP) shipments, we contacted representatives at the WIPP site . They informed us that the costs could not be provided to us but rather we will need to obtain the information from the Contracting Officer for the solicitation. As we are now finalizing our proposal costs, please let us know as soon as possible how we can find out these costs as they are required in the RFP and are significant.

Answer: For proposal preparation purposes, if an offeror's proposed technical approach includes the purchase of RLCs and SWBs, offerors should assume the price for an RLC is \$11,500 each and the price for an SWB is \$2,100 each.
